- Stones

**Patching roads | Cycle Tracks | Footpaths | Pavements | Parking lots | Driveways | Garden and park paths | Utility trenches | Sand and Concrete**

All the functions are hydraulic (auger, screed lifting and lowering, telescopic screed, hopper's opening and closing).

Because of the retractable hydraulic screed, the machine is very versatile and is able to avoid obstacles that may be in the way.

Can be controlled from the skid loader and/or with a wireless remote control.

The wireless remote control allows the operator to have a complete view of the work in front of the machine.

Specs	Units	
Paving width:	m	Minimum 0.20   Maximum 1.9
Paving height:	cm	-5 to 25
Hopper capacity:	m3	1.4
Oil flow:	lt/min	60
Paving speed:	m/min	25
Hydraulic pressure:	bar	180
Weight:	kg	711
Vibration (optional):	Hz	60
Paving direction:		Forward
Paving material:		Cold or Hot (heated by LPG)
Hot paving temperature:	Celsius	140
Feeding:		Front and Lateral
Commands:		From the loader box or by radio control remote
Functions:		100% Hydraulic
Auger's diameter:	mm	200
